Interventions Targeting Reversible Dementia in Down Syndrome

Brandy Callahan PhD, CPsyCh
Psychologist, Neuropsychology & Cognitive Health, Baycrest

Thursday, February 18, 2016
14:00-15:00
ABC Classrooms, 2nd Floor, Baycrest Hospital
3560 Bathurst St. Toronto, ON

Learning Objectives:

- To identify the early signs of dementia in Down syndrome
- To describe different approaches to behavioural difficulties in this population
- To describe the effectiveness of these interventions
- To identify reversible causes of cognitive decline

To Participate Through Telehealth:
Provide your Telehealth Coordinator TSM #52819899 to confirm your site

To Participate by Live Webcast:
Search for Baycrest or TSM #52819899 under live “public” events on http://webcast.otn.ca

Baycrest Behavioural Support Rounds occur every 3rd Thursday of the month. Next Rounds: March 17th

These rounds are restricted to healthcare professionals and students only.
